INDEX

A

Abilities for a technological world, 109-111
Accreditation, 166-167, 238-239
  agencies for, 168-169
  standards/guidelines for, 165-185
    advantages of having, 167
    definition of terms, 165-167
    role and importance of regional and national, 165-169
Accreditation Board for Engineering and Technology, 168n
Action-based curricula, 105
Alliances, 226
Alternative teacher education programs, 121-138
  content to be addressed through, 130-135
    elementary grades, 131-132
    middle grades, 132-134
    secondary grades, 134-135
  engineering model, 130
  Florida 2 plus 2 program, 124-125
  impact of *Standards for Technological Literacy* on, 76
  interdisciplinary model, 125-126
  Maryland model, 127-128
  Old Dominion University, 123-124
  United Kingdom Open University Model, 128-130
  virtual model program, 135-137
American Association for Employment in Education, 122
American Association for the Advancement of Science (AAAS) Project 2061, 1, 12
  history of, 18-19
American Association of Colleges for Teacher Education, 146
American Council on Education, 124
Applied Science Approach, 89
Assessment
  abilities in, 111
  of effectiveness of standards-based technology teacher education programs, 92, 93
  formative, 92
  influence of educational standards on strategies of, 1
  performance, 168-169
  summative, 92-93
Assessment standards, 245-246
  in National Science Education Standards, 14
Atheists, denial of teacher licensure to, 141

B

Benchmarks, in *Standards for Technological Literacy*, 65-67, 101
Benchmarks for Science Literacy, 1, 12, 44
  comparison of, with other standards, 39-40
  content of, 21, 22-29
  goals of, 19-20
  history of AAAS Project 2061 in leading to, 18-19
  organization and structure of, 20-21
  relationship of, to *Standards for Technological Literacy*, 21, 30
Best practices, 127
Bio-related technologies, 195-196
Blanket licensures, 141
Blueprints for Reform, Science, Mathematics, and Technology Education, 40
Breadth versus depth approach, 155
Bush, George, formation of National Education Goals Panel by, 11

C

Center for Research and Development in Teacher Education at the Open University in the United Kingdom, 128-130
Center for Science, Mathematics and Engineering Education, 225
Center to Advance the Teaching of Technology & Science (CATTS), creation of, by ITEA, 226-228
Central Connecticut State University, 204, 205
  Technology Teacher Enhancement Center at, 203
Certification, 141*n. See also* Licensure
  impact of *Standards for Technological Literacy* on, 76
Changing the Subject, 1
Coalitions, 226
Cognitive standards, 63, 109
Collaborative partnership, establishing between teacher education and state department of education, 211-213
College and university teacher education programs, impact of Standards for Technological Literacy on, 75-76
A Conceptual Framework for Technology Education, 176
Consultant model, 202
The Content Core, 12

Cooperative in-service by teacher educators and state departments of education, 209-217
CORD's Applications in Biology/chemistry, 89
Core concepts of technology, 103
Council of Chief State School Officers, formation of the Interstate Teacher Assessment and Support Consortium by, 145
Council on Technology Teacher Education (CTTE), 147. *See also ITEA/CTTE/NCATE Curriculum Guidelines; ITEA/CTTE/NCATE program approval process*
  in preparing standards-oriented technology teachers, 221
Criminal record checks, 142
Cultural values, influence on technology, 104
Curriculum
  influence of educational standards on content in, 1
  role of technology teachers in fostering development of, 87-89
Curriculum and Evaluation Standards for School Mathematics, 11, 30-31

D

Delivery strategies, role of technology teachers in fostering, 89-92
Design abilities, 110
Design Education Approach, 89-90
The designed world, 111-112
Designs for Science Literacy, 40
Direct implementation approach, 202
Direct teaching, 191, 192
Distance learning materials, 129, 214

E

Eastern Illinois University, Illinois Technology Education State Plan and, 197
Education, providing, to implement *Standards for Technological Literacy*, 237-249
Education, U.S. Department of, cofunding of National History Standards Project by, 42
Educational inputs, 2
Educational outcomes, 1-2
Education reform, impact on licensure, 144-145
Education standards
  in English Language Arts, 43-44
  fulfilling the promise of national, 5-7
  in geography, 40-41
  in history, 42-43
    National History Standards Project, 42
    National Standards for History, 42-43
  in mathematics, 30-39
    Curriculum and Evaluation Standards for School Mathematics, 11
    Principles and Standards for School Mathematics, 101
      comparison of, with other standards, 39-40
      content of, 33-38
      goals of, 31
      history of mathematics education leading to, 30-31
      organization and structure of 32-33,
      relationship to *Standards for Technological Literacy*, 39
  perils of national, 3-5
  power of, 1-2
  in science, 12-30
    Benchmarks for Science Literacy, 1, 12, 44, 101
      comparison of, with other standards, 39-40
      content of, 21, 22-29
      goals of, 19-20
      history of AAAS Project 2061 in leading to, 18-19
      organization and structure of, 20-21
      relationship of, to *Standards for Technological Literacy*, 21, 30
    National Science Education Standards, 1, 101
      comparison of, with other standards, 39-40
      content of, 14-17
      goals of, 12-13
      history of development of, 12
      organization and structure of, 13-14
      relationship to *Standards for Technological Literacy*, 17
      strategic framework for standards-based reform in, 5
  in *Standards for Technological Literacy*, 62-64
Electronic transmission of instruction, 135-137
Elementary grades
  development of alternative teacher education programs for, 131-132

in-service laboratory activities for, 199
Engineering, 110
English Language Arts, education standards for, 43-44
Everybody Counts: A Report to the Nation on the Future of Mathematics Education, 11
Experimentation, 108, 110

F

Florida
Florida 2 plus 2 program in, 124-125
loan forgiveness program in, 216
relationship between teacher education and state department of education in, 210, 213, 214-215
Teacher Critical Needs Lists in, 125
Fordham, Thomas B., Foundation, 43
Formative assessments, 92
Foundations of Technology Education, 176-177
Fundamental knowledge base for the study of technology, 102-109
Fundamental processes for the study of technology, 109-112

G

Geography, education standards for, 40-41
Geography for Life, 40-41
Georgia, relationship between teacher education and state department of education in, 210, 213, 214

H

History, education standards for, 42-43
National History Standards Project, 42
National Standards for History, 42-43
Holistic perspective, 88

I

Illinois Technology Education State Plan, 197
Individual curriculum plans, 206
Industrial arts, 193, 194
Industrial Teacher Education Directory, 155
